Z-Square Technology LLC offers the industry's most advanced, comprehensive and intelligent modernization system, AID-IMS.™

### Embrace Modernization, Choose AID-IMS

Designed to meet the needs of today's Motor Vehicle Departments, our Commercial Off-the-Shelf (COTS) modernization system provides enriched features to match the requirements of all agencies. We fully understand the complex processes behind issuing a secure driver's license, vehicle registration, titling and related credentials. AID-IMS provides comprehensive tools to easily meet both short and long-term business objectives of the MVDs.

AID-IMS optimizes operations, improves system flexibility, reduces Department-wide inefficiencies, and helps comply with regulations through its fully integrated, efficient and user-friendly tools.

### Meet the Modern System

AID-IMS provides Motor Vehicle Departments with the most intuitive and comprehensive modernization solutions, which includes powerful systems such as:

- Financial System
- Driver's License System
- Commercial Driver's License System
- Vehicle Registration System
- Titling System
- Financial Responsibility System
- Hearing and Violations System
- Inspection System
- Dealership System
- Inventory Control System
- Robust Communication System
- Notification and Alert System
- Online Interfaces
- Comprehensive and Rapid Reporting System
- And Many Auxiliary Systems

AID-IMS offers more than a system; it offers the most comprehensive solution to ensure that your organization stays on track to achieve its modernization goals. By implementing key metrics and performance management tools, clients gain the insight on progress and reporting that ensures maximum efficiency in project tasks.

### Mobile:

AID-IMS is developed while keeping in mind rapid change in technology trends. We believe that we are not only designing a system for today's demographic but also for future MVD clients who like to stay mobile and require instant service anywhere, at anytime.

### Usability:

Ease of use is another important element in AID-IMS at all levels. Our system architecture and user interface provide intuitive features which reduce processing times and improve user productivity and customer satisfaction.

### Scalability:

"Lets Empower Today's DMV!" is the guiding mantra behind AID-IMS. We understand that Motor Vehicle Departments have budgetary constraints; therefore, we have created a system that is highly scalable at minimal cost to the agency.

### Readily Deployable:

AID-IMS is a COTS solution that is readily deployable with little or no configuration while reducing implementation costs.

### The Reliable Approach

America's ID-Intelligent Modernization System (AID-IMS) provides Motor Vehicle Departments with the most powerful modernization solutions in the industry. Our robust project and change management teams work closely with the Motor Vehicle Departments in providing successful deployment of our solution. Our training team ensures that your Department is fully trained and ready to work with our intuitive and comprehensive solution.
