

Verification and Investigative Network

AID-VIN Application In Some Industries:

- ▶ Motor Vehicle Departments
- ▶ Police Departments
- ▶ Healthcare Agencies
- ▶ Immigration and Refugee Management Agencies

A product of Z-Square Technology, the Verification and Investigative Network known as AID-VIN™ is designed to meet both current and future needs of Motor Vehicle Departments, forensic and investigative divisions of law enforcement agencies, other government departments and private businesses.

Authentication of an individual's identity has become an increasing concern in our modern age. AID-VIN offers background verification tools to confirm and verify an individual's personal data. AID-VIN is designed after careful study of challenges faced by today's Motor Vehicle Divisions and Investigation Departments while identifying an individual's identity or before issuing a secure credential. AID-VIN provides every tool for clients to be more efficient and accurate in verifying the identity of individuals before the issuance of a secure credential.

AID-VIN offers automated and manual verification capabilities, complete verification and investigation workflow management and the industry's leading facial recognition system. The system is also easily configurable with third party databases and systems to provide seamless environment for verification.
